Masjid merupakan pusat peradaban umat muslim. Di masjid masyarakat bisa mempererat hubungan silaturahmi, bermusyawarah, konsultasi syariah, mendapat pencerahan dari para mubaligh dan yang lainnya. Pada zaman Rasulullah Shallallohu'alaihi Wasallam masjid merupakan pusat pengembangan masyarakat yang setiap hari mereka datang dan mendengarkan langsung arahan-arahan dari Rasulullah Shallallohu'alaihi Wasallam. Sebagai daerah mayoritas muslim, di Maluku Utara sudah pasti akan banyak ditemukan masjid. Namun masjid-masjid tersebut statusnya hanya sebagai masjid kota dan kelurahan saja. Fungsinya pun belum sesuai dengan fungsi masjid yang sesungguhnya. Oleh karena itu dengan mengetahui betapa pentingnya keberadaan masjid ditengah-tengah umat dan mengetahui Provinsi Maluku Utara yang mayoritas muslim namun belum memiliki masjid raya, maka sangat perlu kiranya di Maluku Utara dibangun sebuah Masjid Raya. Masjid Raya yang bisa menjadi icon kota provinsi Maluku Utara. Arsitektur *post modern* dipilih sebagai pendekatan desain untuk menjawab Masjid Raya sebagai icon kota provinsi dan harus berpotensi sebagai tujuan wisata.

At the time of the Prophet sallallahu'alaihi Wasallam, the mosque was the center of community development, which every day they came and listened to direct instructions from the Prophet sallallahu 'alaihi wasallam. As a Muslim-majority area, in North Maluku, it is certain that there will be many mosques. However, the status of these mosques is only as city and village mosques. Its function is not yet in accordance with the actual function of the mosque. Therefore, by knowing how important the existence of a mosque is in the midst of the people and knowing the province of North Maluku, which is predominantly Muslim but does not yet have a grand mosque, it is very necessary in North Maluku to build a Grand Mosque. Great Mosque which can become an icon of the city of North Maluku province.
