**RINGKASAN**

Tujuan penelitian yaitu untuk mengetahui pendapatan petani kacang panjang (*Vigna sinensis L*) dan seberapa pengaruhnya karakteristik petani umur, pendidikan, pengalaman berusahatani, luas tanam dan biaya produksi terhadap pendapatan. Lokasi penelitian dipilih secara sengaja (purposive) dengan pertimbangan bahwa Kecamatan Obi sebagai daerah sentra produksi kacang panjang. Penelitian dilaksanakan pada bulan Juli sampai September 2021. Metode yang digunakan dalam penelitian ini adalah metode survey dengan teknik wawancara kepada semua petani kacang panjang berdasarkan kuesioner yang berisikan pertanyaan tentang usahatani kacang panjang. Rata-rata pendapatan petani kacang panjang dalam satu Tahun sebesar Rp.18.983.603. Hasil analisis nilai R-square sebesar 0,774, maka pendapatan usahatani kacang panjang dipengaruhi oleh umur, pendidikan, pengalaman berusahatani, luas lahan dan total biaya sebesar 77,4%. Dari hasil analisis yang didapatkan bahwa variabel karakteristik petani yang berpengaruh terhadap pendapatan petani kacang panjang antara lain pengalaman berusahatani (X3) dan luas tanam (X4) sedangkan variabel umur, pendidikan dan biaya produksi tidak berpengaruh.

***Kata Kunci:*** Karakteristik petani, Usahatani, Pendapatan

**AJUANTO RADJASI. 04371711017. HE EFFECT OF  
CHARACTERISTICS OF LONG BEAN (*Vigna Sinensis L*) FARMERS ON  
HOUSEHOLD INCOME IN OBI DISTRICT**

**SUMMARY**

The aim of the study is to determine the income of long bean (*Vigna sinensis L*) farmers and how the effect of the characteristics of farmers' that are including age, education, farming experience, planting area and production costs towards their income. The research location was chosen purposively with the consideration that Obi District is one of the centers of long bean production. The research was conducted from July to September 2021. The method used in this study was a survey method with interview techniques to all long bean farmers based on a questionnaire containing questions about long bean farming. The average income of long bean farmers in one year is Rp. 18,983,603. The results of the analysis showed the R-square value of 0.774, which indicates that the income of long bean farming was affected by age, education, farming experience, land area and total cost by 77.4%. Based on the results of the analysis, it was found that the variables of farmer characteristics that affect the income of long bean farmers include farming experience (X3) and planting area (X4), while the variables of age, education and production costs have no effect.
