Gunawan La Alu. Law Enforcement Against Fishing Using Explosives in Jorong Islands District, South Halmahera Regency (Implementation of Article 84 of Law Number 45 of 2009 concerning Fisheries). Under the guidance of Muhaimin Limatahu, as advisor I and Arisa Murni Rada as advisor II.

This study aims to determine (1) law enforcement for perpetrators of fishing using explosives in the Jorong Islands District, South Halmahera Regency. (2) factors influencing law enforcement for perpetrators of fishing using explosives in Jorong Islands District, South Halmahera Regency

This type of research consists of empirical legal research types, namely law as a social phenomenon and can also be called field research. Namely a legal research study to determine the extent to which the law enforcement of the crime of using fish bombs is enforced. The location of this research is a place or research area that will be carried out in the Jorong Archipelago District.

Based on the results of the research, it shows that, (1) Law enforcement against perpetrators of fishing using explosives consists of a. Preventive actions, namely, by carrying out patrol activities, legal education to the community as well as integrated patrol activities under the North Maluku Regional Police. b. Repressive action, namely, by imposing sanctions on perpetrators of fishing using explosives, namely by giving a statement. (2) The results of the research related to the inhibiting factors of law enforcement against perpetrators of fishing using explosives consist of several factors, namely, a. law enforcement factors b. facilities and infrastructure factors c. community factors.
