

## **ABSTRACT**

**Istiqomah, 2019.** Students in English who have Javanese abilities experience little in speaking English in the Academic Year 2018/2019. Under the guidance of Dr.Drs. Sutaryo M.Ed, TESOL., M.d. as one guide and Saiful Latif, Spd., M.Hum as the second counselor.

The purpose of the study was to find out the students' ability to use pronunciation, fluency, accuracy and intonation the college student in Java. This research is qualitative research using interview method. This study consisted of 10 respondents in Javanese students who resided in Subaim. The researcher gave 5 questions that were easy for them to answer directly and at the interview they had to use English to answer the questions. Based on analysis data shows that there are some words that they say still use Javanese dialects. There are two respondents who are still good in English pronunciation, there are seven respondents who still have a lot of errors in pronunciation of the English word.
