Hasil penelitian menunjukan bahwa pemahaman keluarga nelayan Desa Fanaha dalam mengelola keuangan mereka suda dijalankan dengan baik namun, tidak ada pencatatan terkait dengan pemasukan dan pengeluaran keuangan keluarga nelayan secara teratur.

Kata Kunci: Pengelolaan Keuangan Nelayan

Abstract

This research aims to understand the concept of financial management for fishermen in Fanaha Village who work as fishermen. The research subjects in this study were the Fanaha Village Community, Kec. Oba Tenggara City of Tidore Islands. Qualitative research with a phenomenological approach is used because the researcher wants to explore the phenomenon as a whole according to events in the field. The data analysis technique is carried out by collecting data from interviews. The results of the research show that the understanding of the fishermen's families in Fanaha Village in managing their finances has been carried out well, however, there is no regular recording of the financial income and expenditure of the fishermen's families.
